CAREER OBJECTIVE

Computer Science graduate and Software Engineer specializing in PHP, Laravel, and MySQL, with experience in building scalable web applications, integrating payment systems, and optimizing backend performance for reliability and efficiency.

TECHNICAL SKILLS

Languages: C, C++, PHP (Core & Laravel), JavaScript
Web Technologies: HTML5, CSS3, Bootstrap, AJAX, jQuery
Database: MySQL
Debugging & Tools: Postman, Log Analysis, VS Code

PROFESSIONAL EXPERIENCE

Innovate Solutions

Apr 2024 – Present

Software Engineer

- Developed and maintained backend systems for a major travel portal using Core PHP.
- Designed and integrated RESTful APIs, utilizing **Postman** for rigorous testing and documentation.
- Integrated various payment gateways including **PayPal**, **QiCard**, Mispay, Tranzila, ManyBag, and Tamara.
- Conducted detailed **Log Analysis** to identify system bottlenecks and resolve performance issues efficiently.
- Managed payment processing workflows including callbacks, validation, and advanced error handling.
- Optimized admin management panels and updated existing features to ensure high scalability.

PROJECTS

Household Materials Transfer System (PHP, MySQL, JavaScript)

- Comprehensive system for managing the transfer of materials with secure authentication.

Doctor Appointment System (PHP, MySQL, JavaScript)

- Digital scheduling platform for clinics and patients to manage appointments.

Company Portfolio (Laravel, AJAX, jQuery)

- Dynamic and responsive corporate website showcasing company services and milestones.
